"Starry village, Ashibetsu"

Overlooking the beautiful starry sky as it descends.

Showa 63 (1988) January 30, the Ministry of the Environment (Environment Agency at the time) recognized Ashibetsu City and it became a "Starry Sky Town" in the "Starry Sky Town / Blue Sky City Contest". 89% of the city area is thickly forested blocking the clear air from the forest and the surrounding light so that the surrounding mountains create an environment that can be called a natural planetarium. If you go a little out of the city you can see the meaning of the name of "Starry Village". There are few street lamps in the night of Ashibetsu, and it is the best way to see the beautiful stars in the northern country.

To see the stars

LOOK

A Near Nokanan Station

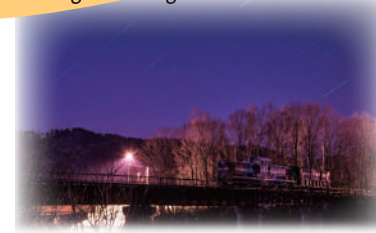

The surrounding area is a quiet paddy field. The sky is wide and feels very close. Indeed, I am impressed by the size of Hokkaido as the stars are falling.

B Near Ashibetsu Onsen Park Golf Course

It's recommended to reserve a room at the Starlight Hotel for anyone who wants to slowly soak in a hot spring after looking at the stars.

C Near the former Mitsui Ashibetsu Railway Tanzangawa Bridge.

I moved from Tokyo to Ashibetsu. In a starry sky that you can never see in the city, you stare and forget the time passing.

Tips on how to take photos Of the starry sky With a smartphone.

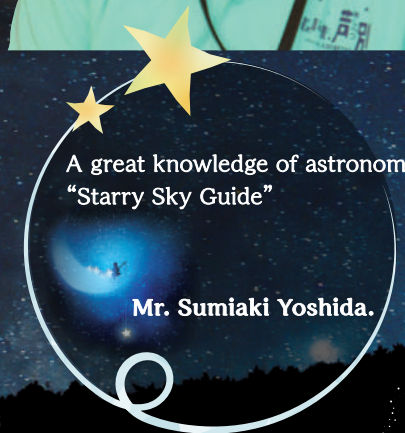

To take photos of the starry sky with a smartphone, the phone camera alone is not suitable. It is best to use a tripod, a remote, and a special app.

You will need an app on your smartphone that allows you to reduce shutter speed, a tripod to fit your smartphone onto, and a way to take photos by remote control.

Why are the stars So beautiful In Ashibetsu?

"Ashibetsu has a very large overall land area, but its population density is low and there are few city lights. And since about 90% of the area is a forested mountain, that mountain becomes a wall and the surrounding city lights are shut out. The air is also clear due to the purification effect of the large forest. Ashibetsu has the conditions to see the stars clearly."

Kenka Yamakasa

"Oisa!" Yamakasa running together, Power beyond imagination!

Yamakasa's main event, Oiyama, is a timed race in which Yamakasa is carried. It's a wonderful time to come and experience the Kenka Festival.

Three streams, Rokkou Nagare, Sakae Nagare and Kita-Daikoku Nagare, flow along the mountain. In addition, the Shi Nagare centered on the city hall is divided into three and helps each style. When the Yamakasa, weighing almost one ton, is moved from the station to the starting point, I was first excited by the shout "Oisa!" During the countdown that tells you to start, the nervous tension wraps around the venue.

Then, at the moment of the long-awaited start, Yamakasa starts running at once with a bigger shout of "Oisa!" You can even feel the road shaking at speeds faster than you think. This is the most exciting moment.

5000 fireworks

Laser beam light show

Flying in the Ashibetsu starry sky!

Under the midsummer night sky A moment of excitement Please enjoy

When the sun goes down, the event finally starts. Live music will be performed by the musicians on the stage and they will head to the grand finale. It is a fusion of 5,000 fireworks, laser lights and music. Just before the fireworks begin, smoke spreads out in the venue, and you may think, "What's going on?" This plays the role of a screen that enhances the effect of the laser beams. The floating smoke creates a fantastic atmosphere and the excitement of the launch increases. Overheard conversations that are full of expectation - "I wonder what is coming?" The time of excitement is coming.

Lasers draw various graphics in sync with the music, and the peoples' heads are colored and everyone enjoys watching. After a break, the long-awaited fireworks launch! These fireworks are like a mountain just in front of you, not to mention the number of fireworks. Because it is very close to the audience, it is attractive that you can enjoy the power of the air vibrating with the sound of the launch.

So let's
have fun!

Stage events and enjoy authentic cuisine

Various events such as shows by children's dance team "Star Kids Dance Max", quiz tournaments, concerts of the citizen brass band, live musicians, etc. are held, and there are lots of shops that you can drop in to and buy things such as drinks, food, and games. Among the foods, there are not only the standard yakisoba, yakitori, shaved ice, etc., but also a hearty dish such as grilled pork and spare ribs.

Lantern making!

Let's make Jack-o-Lanterns!

Speaking of Halloween, a "Jack-O-Lantern" comes to mind immediately, so for the fun of children let's make Jack-O-Lanterns! The pumpkins for decoration are easy to work. Open up the inside and make holes in the shapes of eyes and mouths. This is a very popular event every year!

Jumbo pumpkin-Guess the weight.

Win a prize with the closest answer!

Guess the weight of a giant pumpkin. Anyone can participate. Hold the huge pumpkin in the hall, write your guess of the weight and apply. A wonderful prize gift for a perfect or close answer!!

60 varieties of cherries to choose from

So let's have fun!

Official website

This Orchard, the pride of Ashibetsu,

has been featured in magazines and on TV.

The cherry trees spread all over. The 47,000-square-meter rain dome, larger than Tokyo Dome, is the largest in Japan and can accommodate about 1,000 people at a time. First-time visitors will be amazed by the vastness and greenhouses that fill the orchard. Thanks to this greenhouse, care has been taken to allow cherry picking even on rainy days.

There are about 60 varieties of cherries in the garden, one of the largest cherry orchards in the country, and they are safely grown without the use of chemical fertilizers.

A facility where you can learn while enjoying the history of Ashibetsu

In Heisei 5 (1993) years, this facility that was built to commemorate the Ashibetsu pioneers of 100 years ago. The first thing you will notice is the three towers, which are objects that express the message of the universe, "past," "present," and "future." Let's introduce some of the exhibits inside .

In the "Rich Nature, Flora and Flora" section, there is a powerful diorama of "Kirigishi-yama" in Ashibetsu, known for its valuable alpine plants. Please enjoy amazing realism such as a model of alpine plants as if they were alive.
